

Outlook Web App

If you are experiencing issues with the Desktop version of Microsoft Outlook you may wish to try launching the Outlook Web App.

Firstly, launch your web browser, Microsoft Edge, where you will see your Intranet home page

In the address bar; type, or copy & paste:

<https://outlook.office.com/mail/inbox>

The Outlook Web App will then launch giving you access received emails old and new, and allowing new emails to be created and sent.
